# US Department of education Requirements

The U.S. Department of Education requires that we report and disclose certain information about our school programs in a clear, prominent, user-friendly, and easily understood manner. The intent of the requirement is to enable students to make an informed choice about a program of study. To this end, we have developed documents that may contain the following information\*:

1. The on-time completion rate;
2. The graduation rate;
3. The employment rate(s);
4. The tuition and fees;
5. The median loan debt incurred by students; and
6. The occupations that the program may prepare students to enter, along with links to the O\*NET occupational profiles

## **US Department of Education references from 34 Code of Federal Regulations:**

- Occupation (Sections 600.2, 600.4, 600.5, 600.6, 668.6, and 668.8)
- Gainful Employment Reporting and Disclosure Requirements (Section 668.6)
- Student Right-to-Know Act (Section 668.45(d)(3))

\*Please note that this information is collected and published per federal, state, or accreditation requirements, which may be different between campuses and all information, may not be available for each campus based on those requirements.

# Net Price Calculator

Welcome to the Net Price Calculator! You've come to the right place. We're happy you are beginning to explore how to plan and pay for your college education. We will help you every step of the way. Using the net price calculator, you can find out your eligibility for financial aid from schools to which you plan to apply and estimate your out-of-pocket expenses. Rather than shy away from applying to colleges that seem to be out of your price range, results from the net price calculator will show you how affordable those institutions may be.

Even if you're not going to college in the near future, the net price calculator will still be helpful. Younger students and their parents can use this tool to learn about college costs and receive early financial aid information. You can create "what if" scenarios based on expected family income and anticipated expenses, and start to plan and save well before applying to college.

Colleges have different resources and financial aid policies, so your "net price" will vary from institution to institution. Also, special circumstances are considered by financial aid offices on a case-by-case basis. If your situation is unusual, you may want to contact the financial aid office at the colleges to which you are admitted.

When you're ready to begin, you can sign in with your College Board user name and password or use the calculator as a guest. The advantage of signing in is that the information you enter will be saved in your account, so you can use it again and again to calculate your net price at other colleges of interest. Good luck!

How does it work? The calculator measures the financial strength of your family and uses other facts you provide to estimate the amount of grants, scholarships and other financial aid that is likely to be available to you. Your "net price" is the difference between that amount and the cost of attendance.

The calculator is designed to give you an early indication of how much and what types of financial aid you might qualify for if you were a college freshman attending school full-time in the academic year indicated. It is a tool which we hope will give you a clear picture of options and opportunities so you can make more informed decisions about your college choices.

As you use the calculator, please remember:

1. This is not an application for admission or financial aid.
2. The results will only be as reliable as the data you provide.

3. The net price calculator will only give you an estimate of your net price and aid eligibility. The financial aid office has the final word on your financial aid award.
4. You must complete the Free Application for Federal Student Aid (FAFSA) as soon as possible after January 1 of the year you plan to attend college.

Completing the calculator should take no more than 20 minutes of your time. You will need to answer some basic questions about your parents' financial situation so it might be helpful to have recent tax forms or pay stubs on hand before you begin.

**READY TO MOVE FORWARD? Sign in with your College Board user name and password, sign up for a College Board account, or enter as a guest.**

NOTE:

The estimate provided using this net price calculator does not represent a final determination, or actual award, of financial assistance. The price of attendance and financial aid availability may change. This estimate shall not be binding on the Secretary of Education, this institution of higher education or the State in which this institution of higher education is located.

For more information about applying for federal student aid, please go to [www.fafsa.ed.gov](http://www.fafsa.ed.gov)

For more information on Preferred Browsers for viewing and using the Net Price Calculator please go here.

To use the net price calculator there are eight elements for the student to enter:

Age

Marital Status

Children

Family Size

Number of family members in college

Parent income for dependents (or household income for independents)

Living status (on campus, off campus, or with parents)

Residency Status (in state or out of state)
